

Everyone's "biased feel" is different. This chart is my best faith effort at describing these products based on my own experience and use. The VG-N/a scale was created to be as fair as possible. For example N/a is used in Rigidity for the flexible waxes not intended to be Rigid, Even though I believe some deserved "Excellent" in any given category, I refrained from using that in the ratings to avoid mis-leading anyone.

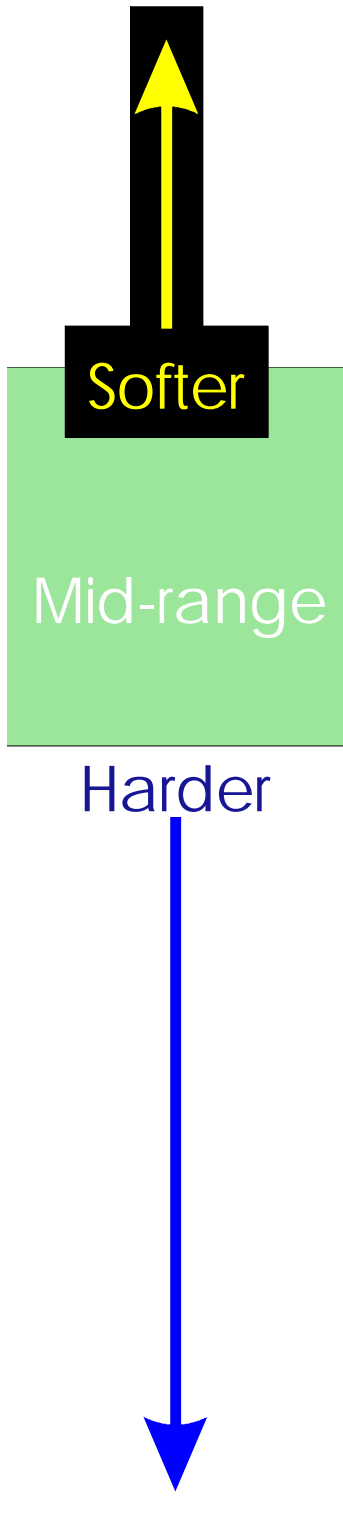

www.WillowProducts.com

N/a = Not applicable

F = Fair

G = Good

VG = Very Good

Name	Modeling					
	Castable	Carve with tools	Work with Hot Pen	Model without heating	Bend without break	Rigidity
VAPOR Very Soft Modeling	G	VG	N/a	VG	VG	N/a
AIR Soft Modeling	G	VG	F	VG	VG	N/a
ETHER Firm Modeling	G	VG	G	G	G	F
Steam Stiff Modeling	G	VG	VG	F	G	G
MIST Hybrid Modeling	G	VG	VG	F	F	VG
WATER Firm Hybrid Tooling	G	VG	VG	N/a	N/a	G
Earth Firm Hybrid Tooling	G	VG	VG	N/a	N/a	VG
FIRE Hard Hybrid Tooling	G	VG	VG	N/a	N/a	VG
METAL Hard Hybrid Tooling	G	VG	VG	N/a	N/a	VG
WOOD Med. Hard Tooling	VG	VG	VG	N/a	N/a	VG
STONE Hard Tooling	VG	G	VG	N/a	N/a	VG
